Dear Everyone,

FF are proud to be a part of this community initiative to reduce our carbon emissions. As well as reducing our emissions, the single best thing we can do to save our planet right now is to offset our carbon. Offset your lifestyle or holiday travel and please tell your friends to do the same here: www.parkecovillagetrust.co.uk

The offset projects used here are certified and regulated and so you know for sure that every ounce of your carbon is really being offset!

...

After the Internal Conference we will begin to embed this into our website and also into our external communications with guests and visitors inviting them to also offset their emissions.

So please use it and remember it is an invitation to offset your house / car / train / flights etc as well as a reminder to reduce your fossil fuel and energy use in your everyday lives.

We work on many levels to support healthy change and transformation in our world right now, and one of these is with the serious issue of carbon. This is part of our long term aims as a centre of demonstration to the world, that we want to take care of nature and our planet. We want to reduce and offset our emissions as a Community, an International Course Centre and as Individuals. This calculator will measure how well we are doing as a whole organism as we go along.

Huge love and appreciation, Gabrielle and the Steward Circle
